DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent Abstract 9-221642 (the abstract).

The abstract teaches a flat cable coating material and cable coated therewith, said coating comprising a film that includes filler material of the type contemplated by applicants, such as a phosphorus compound. The mass ratio of the filler material would have been obvious to determine during routine experimentation and thus is construed to be optimizable. Therefore, the teachings of the abstract would have rendered obvious the invention as claimed in present claims 1-11.

No claims are allowed.
